SAFE WORK PRACTICE

Name of Job: Roofing	Development Date:	Developed By:	Approved By:	Review Date:
--------------------------------	-------------------	---------------	--------------	--------------

Possible Hazards Present

Falls from heights	Slips, trips & falls	Repetitive motion Strains	
--------------------	----------------------	------------------------------	--

Personal Protective Equipment (PPE) and Devices Recommended

Fall protection equipment	Steel toed boots	Head Protection	Eye Protection
---------------------------	------------------	-----------------	----------------

What are some good general safe work practices?

- **DO** ensure that you check the roof surface for ice or dampness prior to climbing onto the roof
- **DO** ensure that traffic on a roof should be avoided as ice, snow and frost make the surface hazardous
- **DO** ensure when removing snow, avoid direct contact with shingles as this will scrape off the protective granules
- **DO** ensure when applying shingles in temperatures below 0°C, handle shingles with care as they can become brittle.
- **DO** maintain a safe distance from power lines and ensure neither your body nor any equipment come into contact with the lines. When in doubt, call NS Power to have the lines insulated or de-energized.
- **DO** wear clothing appropriate to the task. Remember you can get sun burn and hypothermia at the same time when working at heights.
- **DO** ensure the roof is kept clean of debris such as wood, shingle parts and dirt. Be aware of loose items, such as electrical cords and tools.
- **DO NOT** walk on the roof when not necessary, as this may cause even more damage and increase your risk of falling.
- **DO** ensure adequate fall protection devices are used at all times.

Please note: This document is for information purposes only as a guide. The safe job procedures (SJP) and safe work practices (SWP) created for your workplace should reflect your organizations processes, equipment and hazards as identified by a hazard analysis. Construction Safety Nova Scotia does not assume responsibility for the use of information in this document. If assistance is needed to complete a SWP and SJP for your organization please contact CSNS member services at constructionsafetyns.ca or 1.800.971.3888.
