Hearing protection			

#### What are some good general safe work practices?

- **DO** ensure that the proper personal protective equipment (PPE) to be worn is set out in the manufacturer and Occupational Health & Safety Legislation.
- **DO** ensure that the chain brake is functioning properly and adequately stops the chain.
- **DO** ensure that the chain must be sharp and has the correct tension and be adequately lubricated.
- **DO** ensure that the correct methods of starting, holding, carrying or storage and use of the saw as directed by the manufacturer must be used.
- **DO NOT** use the chain saw for cutting above shoulder height.
- **DO** ensure that fueling is done in a well-ventilated area and not while the saw is running or hot.
- **DO** use an approved safety container must be used to contain the fuel used along with a proper spout or funnel for pouring.
- **DO** ensure that when carrying/transporting a chain the bar guard must be in place, the chain bar must be toward the back and the motor must be shut off.
- **DO** follow Chainsaw Safe Work Procedures step by step.

Please note: This document is for information purposes only as a guide. The safe job procedures (SJP) and safe work practices (SWP) created for your workplace should reflect your organizations processes, equipment and hazards as identified by a hazard analysis. Construction Safety Nova Scotia does not assume responsibility for the use of information in this document. If assistance is needed to complete a SWP and SJP for your organization please contact CSNS member services at [constructionsafetyns.ca](http://constructionsafetyns.ca) or 1.800.971.3888.
