### Safe Job Procedures

<b>Name of Job:</b> <b>Cold Start Equipment</b>	<b>Development Date:</b> <b>March 30th, 2011</b>	<b>Developed By:</b> <b>CSNS</b>
--	---	-------------------------------------

### Possible Hazards Present

Equipment failure      Slips, trips & falls

### Personal Protective Equipment (PPE) and Devices Recommended

Steel toed boots

### What is a proper safe job procedure to follow?

- Check all appropriate fluid levels and record in pre-trip book
- Visually inspect for leaks and worn belts
- Do a walk around inspection to ensure it is safe to start machine
- Proceed to start engine using the three point contact to enter machine
- Let machine idle and do another overall check for leaks
- Once machine is warm, proceed to task

Please note: This document is for information purposes only as a guide. The safe job procedures (SJP) and safe work practices (SWP) created for your workplace should reflect your organizations processes, equipment and hazards as identified by a hazard analysis. Construction Safety Nova Scotia does not assume responsibility for the use of information in this document. If assistance is needed to complete a SWP and SJP for your organization please contact CSNS member services at [constructionsafetyns.ca](http://constructionsafetyns.ca) or 1.800.971.3888.
