## Safe Job Procedures

<b>Name of Job:</b> <b>Supporting (Chocking)</b> <b>Dump Boxes</b>	<b>Development Date:</b> <b>March 30th, 2011</b>	<b>Developed By:</b> <b>CSNS</b>
--	---	-------------------------------------

### Possible Hazards Present

Serious injury	Pinch points	Potential death
----------------	--------------	-----------------

### Personal Protective Equipment (PPE) and Devices Recommended

Eye protection	Steel toed boots	Hand protection	Hard hat
----------------	------------------	-----------------	----------

### What is a proper safe job procedure to follow?

- Park and block truck in neutral with the power take off (PTO) and pump engaged
- Raise truck box to desired level
- A Stiff Leg is a permanently attached pivot and rest, and is the preferred method of support
- If not available, use the following:
  - 6"x 6"x 6" long timber block across the truck frame between the box and subframe as close as possible to the box hinge
  - 2 pieces of 4"x 4"x 6" timber placed vertically between tandem tire and the box
  - Pin locks provided by the manufacturer to secure the box in the elevated position
- Only keep the box lifted for as long as required

Please note: This document is for information purposes only as a guide. The safe job procedures (SJP) and safe work practices (SWP) created for your workplace should reflect your organizations processes, equipment and hazards as identified by a hazard analysis. Construction Safety Nova Scotia does not assume responsibility for the use of information in this document. If assistance is needed to complete a SWP and SJP for your organization please contact CSNS member services at [constructionsafetyns.ca](http://constructionsafetyns.ca) or 1.800.971.3888.
